## Review of Immunology

### SK Sekaran MD

Assistant Professor of Biochemistry, Chennai Medical College,  
Hospital & Research Centre (SRM Group), Tiruchirapalli, Tamil  
Nadu;

Head of the Dept of Biochemistry, Doctors Diagnostic Centre, Tamil  
Nadu, India

This book simplifies the basic concepts of immunology and presents the relevant points in a succinct and structured manner, thereby allowing students to understand the complex interactions in the human immune system.

### Key Points

- Explains the general principles of immunology in human diseases including infectious diseases, autoimmunity, immunodeficiency diseases, AIDS, cancer, transplantation of organs, tissues and vaccines
- Describes key diseases from the perspective of immunopathogenesis, symptoms, signs, laboratory methods and treatment
- Provides an overview of the discovery of antigens and the development of immunology along with a short description of immune reactivity and the physiology of the immune system

## Table of Contents

1. Immune System
2. Development of Immune Cells
3. CD Markers
4. Immune Response
5. Theories of Immune Response
6. Antigen – Antibody Interactions
7. Antibody Diversity
8. Complement
9. Cytokines
10. Immunogenetics
11. Major Histocompatibility Complex
12. Hypersensitivity
13. Immunology of Transplantation
14. Immunohaematology
15. Auto Immunity
16. Primary Immunodeficiency Diseases
17. Nobel Laureates of Immunology
18. MCQs
